I think this suit should be settled quickly and move on to crimes that are hurting the country. Microsoft led technology into a boom in the 90's and led it into a bust when the Justice Dept. went after them and threatened to take them down. I think this suit has hurt the whole economy and the stock market. My retirement fund, as well as millions of other people's, has gone down over 50% . I think this suit got the plunge started.
